

Stock Pick of the Week #45

This week's pick is PHYS the Sprott gold trust at 11.57

PHYS is a gold trust with a novel option. It allows investors at a certain minimum level to withdraw gold from the trust at their convenience.

For details please visit the website: www.sprottphysicalgoldtrust.com

Featured is the Sprott Physical Gold Trust chart. Price is carving out a pennant formation and the RSI and MACD indicators are at support, ready to turn up. A breakout at the blue arrow turns the trend bullish.

 #43 PMT.TO at 5.12 (PMGYF), last traded at 5.20
 #44 HBU.TO, at 26.50, last traded at 25.46

12 Picks have been sold at profits ranging between 10% and 110%, all within 5 months of purchase. 11 picks are trading above the introductory price and 21 are available at or below the starting price. There are some truly great bargains among these 21, due to the recent correction in the HUI index of gold and silver stocks.

To make a profit and 'sell high' we must first 'buy low'.

The success ratio (winners versus 'waiting to be winners'), is 23 to 21.

Subscribers are notified as soon as we take a profit.

We encourage investors not to 'chase' these picks, but to try to buy them at or below the price at which they were introduced. **As long as a 'pick' remains part of this list, it is an indication that we still like it, even if it slips below the price at which the stock was first listed.**

Whenever you buy a stock at its pink listing (the five letter symbol), always be 'price-specific' with your order to avoid ending up with a 'bad fill'. The recommended procedure for buying or selling 'pink sheet stocks' is explained at the bottom of an article on the website titled: "The making of a successful investor."

To be notified when we take profits, all you need to do is become a subscriber. (The cost is less than \$2 per week). For details, click on 'how to subscribe.'
