

Stock Pick of the Week # 18, December 11/2009 AD

This week's pick is Market Vectors Junior Gold Miners, the ETF that is managed by Van Eck Global and trades on the NYSE as GDXJ.

GDXJ tracks 38 junior miners and explorers. By buying into this ETF we save ourselves the trouble of having to research the juniors that are part of this ETF and we spread the risk around. We wrote about GDXJ for our website. The article is in our archives. GDXJ last traded at 26.14; this is just 0.14c above the introductory price. For additional information visit www.vaneck.com/gdxj

Featured is the daily bar chart of GDXJ. Price is trading right around the introductory price. Some eager bearers have already paid up to 29.55 for the stock. Our patience to 'buy low' has paid off.

Featured is the index that compares the performance of GDXJ to GDX. Although the comparison covers a period of less than 30 days, it does indicate that GDXJ could very well continue to outperform GDX.
